SUMMARY

Frontend developer with 7 years of experience building and modernizing production web applications with Vue.js, TypeScript, React and Next.js. Sole frontend developer at a travel booking company, where I rebuilt the booking platform, migrated legacy jQuery sites to a component-based codebase and built a shared component library. Experienced in owning features end to end, from Figma designs and REST API integration to production releases, with a focus on reusable components, web performance and responsive, mobile-first interfaces.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
Frameworks and libraries: Vue.js, React, Next.js, Vuetify, shadcn/ui
Styling: Tailwind CSS, responsive and mobile-first design, design systems, component libraries
Backend and data: REST APIs, Supabase, PostgreSQL, Row Level Security, real-time subscriptions
Performance and SEO: Core Web Vitals, image and asset optimization, Open Graph, structured data
Tools: Git, GitHub, Figma, ESLint
Mobile: React Native, native Android development

EXPERIENCE

Frontend Developer, Takt Tours Ltd. · Nea Makri, Greece — June 2019 – Present

Sole frontend developer for the company's travel booking platform.

- Rebuilt the booking platform from scratch in Vue.js, TypeScript and Vuetify, owning frontend architecture, development and releases.
- Led the migration of legacy jQuery, HTML and SCSS websites to a responsive, mobile-first, component-based frontend.
- Built a shared component library and UI patterns used across the company's products, keeping the interface consistent and speeding up feature work.
- Improved Core Web Vitals and organic search visibility through image compression, asset optimization and performance tuning.
- Integrated the frontend with REST APIs and backend services for the full booking flow.
- Turned Figma designs into production features, working directly with design and backend.
- Built responsive HTML email templates for marketing and booking communications.

Frontend Developer (Freelance), Flatpulse · Athens, Greece — April 2025 – April 2026

- Built the first version of the flatpulse.gr frontend, a roommate-matching platform, with Next.js, TypeScript and Tailwind CSS.
- Set up the frontend architecture and reusable components the platform was built on.
- Took on full-stack tasks with Supabase for data and backend logic.
- Delivered a responsive, mobile-first interface across the platform.

PROJECTS

Pickle Poll · Next.js, React, TypeScript, Tailwind CSS, Supabase

- Built and launched a real-time polling app: users create a poll, share a link and see votes update live through Supabase Realtime.
- Secured data with PostgreSQL Row Level Security, Cloudflare Turnstile bot protection and a Content Security Policy.
- Added authentication, creator notifications, dynamic Open Graph images per poll and SEO with sitemap and structured data.
- Built the UI on a token-based design system with shadcn/ui and Tailwind CSS.

CERTIFICATIONS

- Responsive Web Design | FreeCodeCamp
- Android Development Bootcamp (3 months) | Vellum Global Educational Services
